Title: The orexin system : basic science and role in sleep pathology / volume editors, M.A. Steiner, M. Yanagisawa, M. Clozel.

Other titles: Frontiers of neurology and neuroscience ; v. 45. 1660-4431

Description: Basel ; Hartford : Karger, 2021. | Series: Frontiers of neurology and neuroscience, 1660-4431 ; vol. 45 | Includes bibliographical references and indexes. | Summary: "Discovered in 1998, the orexin system lies at the core of the sleep and wake state regulation inside our brain. This book summarizes recent research, ideas and perspectives from some of the most influential researchers in the fields of hypocretin/orexin and sleep. For example, it explains the intricate role of the orexin system in the different sleep phases and in the pathways that are related to memory and cognition. It also provides an overview of diseases which are caused by, or associated with a dysfunctional orexin system, such as narcolepsy, insomnia, substance abuse, or Alzheimer's disease"-- Provided by publisher.

Disclaimer. The statements, opinions and data contained in this publication are solely those of the individual authors and contributors and not of the publisher and the editor(s). The appearance of advertisements in the book is not a warranty, endorsement, or approval of the products or services advertised or of their effectiveness, quality or safety. The publisher and the editor(s) disclaim responsibility for any injury to persons or property resulting from any ideas, methods, instructions or products referred to in the content or advertisements.

Drug Dosage. The authors and the publisher have exerted every effort to ensure that drug selection and dosage set forth in this text are in accord with current recommendations and practice at the time of publication. However, in view of ongoing research, changes in government regulations, and the constant flow of information relating to drug therapy and drug reactions, the reader is urged to check the package insert for each drug for any change in indications and dosage and for added warnings and precautions. This is particularly important when the recommended agent is a new and/or infrequently employed drug.

Sponsor Note

Idorsia Pharmaceuticals Ltd. supported the development of this volume of the Frontiers of Neurology and Neuroscience book series.

Disclosures

The Guest Editors declare that during the development of the book, Michel A. Steiner and Martine Clozel were employed by Idorsia Pharmaceuticals Ltd., Allschwil, Switzerland, and that Professor Yanagisawa, an independent researcher (Director and Professor of the International Institute for Integrative Sleep Medicine [WPI-IIS], University of Tsukuba, Ibaraki, Japan) received consultancy fees from Idorsia Pharmaceuticals Ltd.

Editorial assistance for the development of the book was provided by Jessica Beake (Beake Medicom), funded by Idorsia Pharmaceuticals Ltd.

Contents

IX Preface

Steiner, M.A. (Allschwil); Yanagisawa, M. (Tsukuba); Clozel, M. (Allschwil)

Section I: The Orexin System and Its Role in Regulating Sleep and Wake

- 1 Twenty-Three Years of Hypocretins: The “Rosetta Stone” of Sleep/Arousal Circuits**
de Lecea, L. (Stanford, CA)
- 11 Interaction between Orexin Neurons and Monoaminergic Systems**
Sakurai, T.; Saito, Y.C.; Yanagisawa, M. (Tsukuba)
- 22 Hypocretin/Orexin Receptor Pharmacology and Sleep Phases**
Sun, Y.; Tisdale, R.K.; Kilduff, T.S. (Menlo Park, CA)
- 38 Sleep, Orexin and Cognition**
Toor, B.; Ray, L.B.; Pozzobon, A.; Fogel, S.M. (Ottawa, ON)

Section II: Cellular and Molecular Dissection of the Orexin System

- 52 Subsecond Ensemble Dynamics of Orexin Neurons Link Sensation and Action**
Burdakov, D. (Zürich)
- 61 Heterogeneity of Hypocretin/Orexin Neurons**
Sagi, D. (Ramat-Gan); de Lecea, L. (Stanford, CA); Appelbaum, L. (Ramat-Gan)
- 75 Sleep and Metabolism: Implication of Lateral Hypothalamic Neurons**
Oesch, L.T.; Adamantidis, A.R. (Bern)
- 91 Cellular Signaling Mechanisms of Hypocretin/Orexin**
Kukkonen, J.P.; Turunen, P.M. (Helsinki)

Section III: The Orexin System in Sleep Pathology

- 103 Sleep Problems in Narcolepsy and the Role of Hypocretin/Orexin Deficiency**
Mignot, E.; Zeitzer, J. (Palo Alto, CA); Pizza, F. (Bologna); Plazzi, G. (Bologna/Modena)
- 117 The Insomnia-Addiction Positive Feedback Loop: Role of the Orexin System**
Fragale, J.E.; James, M.H.; Avila, J.A. (Piscataway, NJ); Spaeth, A.M.; Aurora, R.N.
(New Brunswick, NJ); Langleben, D. (Philadelphia, PA); Aston-Jones, G. (Piscataway, NJ)
- 128 Causes and Consequences of Chronic Sleep Deficiency and the Role of Orexin**
Mullington, J.M.; Cunningham, T.J.; Haack, M.; Yang, H. (Boston, MA)
- 139 Hypocretin/Orexin, Sleep and Alzheimer's Disease**
Dauvilliers, Y. (Montpellier)
- 150 Author Index**
- 151 Subject Index**
