

TABLE OF ELECTRONIC SIGNATURE LEGISLATION 2023

Compiled and maintained by Stephen Mason

The list of statutes listed below is probably not comprehensive, and the accuracy of citations might not be correct in every case, especially with Member States of the European Union since the Directive was repealed by the new Regulation. For obvious reasons, it is not possible to rely on the accuracy of this list, which is provided as a first point of research.

If you are aware of any inconsistencies or revisions in any of the legislation listed below, please do not hesitate to get in touch.

I acknowledge the help of Luca Castellani, Legal Officer, International Trade Law Division of the Office of Legal Affairs at the United Nations Vienna International Centre, who had kindly kept me informed of legislation as it has been notified to the United Nations. We exchange copies of the legislation when we obtain copies in electronic form. Not all of the legislation noted below includes such information as the details of the relevant gazette or when it has entered into force, because such information is very difficult to obtain in some jurisdictions.

¹ The Cabinet Law Committee, held under the chairmanship of Professor Sarwar Danesh, the second vice president, approved the draft law on electronic transactions and signatures on Sunday 17 August 2020, and the law was signed by the President and entered into force on 29 August 2020. Gazette Number 1389 dated 28 October 2020.

² Other than section 20, into force on 26 March 2002 by the Electronic Transactions (Alderney) Law 2001 (Commencement) Ordinance, 2002; Consolidated version: (No. XXVI of 2001 (Ordres en Conseil Vol. XLI, p. 746); as amended by the Electronic Transactions (Cheque Imaging) (Alderney) Ordinance, 2017 (Alderney Ordinance No. VII of 2017); see also the Mental Health (Miscellaneous

I also acknowledge the help of Dr Quynh Anh Tran, lecturer at Hanoi Law University in Hanoi, Vietnam for the up-date to the Vietnamese law; Daniel Brantes Ferreira, Editor-in-Chief of the Brazilian Journal for Alternative Dispute Resolution and Professor at Ambra University for the up-date in relation to Brazil, and Dr Iwan Permadi, Faculty of Law, Brawijaya University, Malang for the up-date in relation to Indonesia.

³ Journal Officiel de la République Algérienne No 6, 20 Rabie Ethani 1436, 10 février 2015, 6-14. The Code Civil was amended by Loi n° 05-10 du 20 juin 2005 modifiant et complétant l'ordonnance n° 75-58 du 26 septembre 1975, modifiée et complétée, portant code civil. Article 323 was amended by introducing article 323bis and 323ter, introducing the concept of written evidence and providing that data in electronic format has the same probative force as paper documents. There was an implicit recognition of electronic signatures, and slightly more specific provisions were included with the introduction of article 323ter. This law now appears to repeal the changed made to the Civil Code, in accordance with article 81. Article 76 provides that electronic signatures and certification authorities have to

³¹ General Law of Telecommunications, Information and Communication Technologies – this law appears to have replaced Proyecto de Ley No 080/2007 sobre Documentor, Firmas y Comercio Electrónico.

³² Passed by the National Assembly on 9 April 2014. Date of assent 14 May 2015. Date of commencement: on notice (not known if notice issued to date).

³³ Provides for the legal validity of electronic documents and electronic signatures. Medidas Provisorias (MP) are normally Presidential Bills which need to be sanctioned by Parliament after 30 days of publication. If they have not been sanctioned, they cease to be enforced after this period. If sanctioned, they become law. This specific MP has become law through Constitutional Amendment no. 32 of 2001, which determined that all MP not yet sanctioned by Congress by September 2001 but which were still in force at that time, were converted into law.

³⁴ Provides for the use of electronic signatures in interactions with public entities, in acts of legal entities and in health matters and on software licenses developed by public entities; it amends Law No. 9096, of 19 September 1995, Law No. 5991, of 17 December 1973, and Provisional Measure No. 2200-2, of 24 August 2001. This law complements Provisional Measure No. 2200-2 which is still valid. The new law only relates to public entities. That was a necessity because of the pandemic. The Provisional Measure remains valid for private entities and it is the general rule.

Electronic Transactions Act, 2008 (Act 772)

⁸⁸ Section 3(a) of this law implements SigG in German administrative law. This implements the digital signature and the infrastructure for certification authorities.

⁸⁹ Section 126(a) implements the provisions of SigG into German civil law and gives digital signatures parity of treatment to the manuscript form; §127 Abs 3 provides for types of electronic signature other than digital signatures to have the same standing as provided under SigG. It should be noted that sections 623 (cancellation of a contract of employment), 630 (employer's obligation to deliver certificates of employment), 766 (guarantees/bonds), 780 (promise to perform an act in which the obligation is created solely by the promise itself), 781 (acknowledgement of debt) of the BGB and Section 4 of the Consumer Loan Act (Verbraucher kreditgesetz – VerbrKrG) provide that in these specific instance, an electronic signature is not possible or invalid, which slightly mitigates the importance of section 126a BGB. These exceptions concern sections of the BGB that the legislator considered must remain as manuscript signatures.

⁹⁰ Section 292(a) implements SigG in the German Code of Civil Procedure. This provides for the presumption that digital signatures conforming to the requirements set out in SigG are acceptable, subject to a challenge that the digital signature was misused without the authority of the subscribing party.

Brought into force on 22 March 2001 by Legal Notice 13/01. The citation has been altered pursuant to the commencement of the new Gibraltar Constitution in 2007. All Gibraltar statutes, previously known as Ordinances, have, since the commencement of the new Constitution on 2 January 2007, now been re-named as Acts.

⁹² Passed on 13 June 2001 and in force from the date published in the Gazette (Government Gazette, Issue A', No. 125/25.06.2001). The Decree implemented the EU Directive, which was repealed by the EU Regulation. By not up-dating the Decree, this infers that the Decree is no longer operative and the EU Regulation applies directly to Greece in the absence of any domestic legislation.

laws to the extent that if there is any conflict between the federal and state law, unless (1) the state has enacted the Uniform Electronic Transactions Act or (2) the state has adopted law which is congruent with E-SIGN. The Uniform Electronic Transactions Act is not itself law, except as adopted by individual states. At the time of writing, at least 43 states have adopted UETA. President Clinton signed Senate Bill 761 on 30 June 2000 with the private key of a digital signature, stored on a smart card. It does not appear that there was any enabling legislation to enable the President to sign the Bill other than with a manuscript signature. Section 7 of the United States Constitution provides that for a Bill to become a law, it must be presented to the President of the United States, and 'If he approve he shall sign it'. Given that the Constitution was written some time before electricity, the implication is that the President must sign a Bill with a manuscript signature. This means either (a) the Electronic Signatures in Global and National Commerce Act is not valid for lack of form, or (b) it is valid, but superfluous, because both the case law before the Bill was enacted and the signing of the Bill by the President with the private key of a digital signature demonstrated that no law was required.
