

Information for Authors

Scope

The IEEE TRANSACTIONS ON COMPUTATIONAL INTELLIGENCE AND AI IN GAMES (TCIAIG), publishes archival journal quality original papers in computational intelligence and related areas in artificial intelligence applied to games, including but not limited to videogames, mathematical games, human-computer interactions in games, and games involving physical objects. Emphasis is placed on the use of these methods to improve performance in and understanding of the dynamics of games, as well as gaining insight into the properties of the methods as applied to games. It also includes using games as a platform for building intelligent embedded agents for the real world. Papers connecting games to all areas of computational intelligence and traditional AI are considered.

Publication Timeline

Every effort is made to ensure minimum delay from submission to publication. Authors have a key role to play in minimising the delay between initial submission and publication, largely by ensuring that manuscripts are of high quality both in terms of content and presentation. Use of a proof-reading service is highly recommended for any authors who are not native English speakers.

When the final version of a manuscript is accepted, it is immediately published electronically on IEEE Xplore and given a Digital Object Identifier (DOI), at which time it enters the queue for publication in the paper version. In line with the IEEE's policy on scholarly publishing, authors are also free to archive the PDF of the published paper on their own website or institutional repository.

Types of Contributions

TCIAIG publishes letters, short papers, and full papers. Letters typically comment on existing papers but may also present new research where the result may be concisely described and are limited to four pages in the journal's two-column format. Short papers report sufficiently interesting new theories and/or developments/results/simulations/experiments on previously published work in the area. and are limited to six pages in the journal's two-column format. Full papers may be research articles, surveys, or tutorials. They are archival quality papers making a significant contribution to the field. and are limited to 10 pages. Any additional pages are subject to overlength page charges, with the total not exceeding 14 pages.

Survey papers will focus on a specific area related to the journal. They will provide a historical perspective, highlight recent work, provide a broader perspective of the area and suggest future areas of potential research, as well as outlining open questions. Survey papers are limited to 15 pages. Any additional pages are subject to overlength page charges, with the total not exceeding 20 pages.

Style for Manuscript

The TCIAIG follows the standard format IEEE TRANSACTIONS. For guidelines and templates please follow this link: <http://www.ieee.org/web/publications/authors/transjnl/index.html>. A list of 2–5 keywords is required for all manuscripts. Authors are encouraged to put detailed derivations in appendixes. Authors must suggest a publication category for their paper, but this may be changed by the Editor-in-Chief.

Abstract

In order for an abstract to be effective when displayed in IEEE Xplore® as well as through indexing services such as Compendex, INSPEC, Medline, ProQuest, and Web of Science, it must be an accurate, stand-alone reflection of the contents of the article. The abstract must be a concise yet comprehensive reflection of what is in your article. In particular:

- The abstract must be self-contained, without abbreviations, footnotes, or references. It should be a microcosm of the full article.
- The abstract must be between 150 and 250 words. Be sure that you adhere to these limits; otherwise, you will need to edit your abstract accordingly.
- The abstract must be written as one paragraph, and should not contain displayed mathematical equations or tabular material.
- The abstract should include three or four different keywords or phrases, as this will help readers to find it. It is important to avoid over-repetition of such phrases as this can result in a page being rejected by search engines.
- Ensure that your abstract reads well and is grammatically correct.

Author Biographies

Authors can publish a short biography, along with a picture, for each of the authors. This is optional and authors can decide to omit these. The biographies must either include all authors, or not be provided for any authors.

Submission of Manuscripts

All correspondence concerning submissions is between the author, Editor-in-Chief and Editorial Assistant. To submit your paper for consideration, visit the web submission system at ScholarOne Manuscripts found at <http://mc.manuscriptcentral.com/tciaig-ieee>. Here you can create a new account or use an existing one if you have one, and submit a first draft of a new manuscript. Use ample margins on all sides, and please ensure that your uploaded file prints without error on both 8.5 × 11 inch and A4 paper.

This TRANSACTIONS is devoted primarily to archival reports of work that have not been published elsewhere. Specifically, conference records and book chapters that have been published previously are not acceptable unless and until they have been enhanced significantly. In special circumstances or on exceptional occasions, the editor may deem a contribution noteworthy enough to be exempted from this policy. Ensure that in "Comments to Editor-in-Chief" you state that the work being submitted has not been published elsewhere, nor is it under review currently by another publication.

Open Access

This publication is a hybrid journal, allowing either Traditional manuscript submission or Open Access (author-pays OA) manuscript submission. Upon submission, if you choose to have your manuscript be an Open Access article, you commit to pay the discounted \$1,950 OA fee if your manuscript is accepted for publication in order to enable unrestricted public access. Any other application charges (such as overlength page charge and/or charge for the use of color in the print format) will be billed separately once the manuscript formatting is complete but prior to the publication. If you would like your manuscript to be a Traditional submission, your article will be available to qualified subscribers and purchasers via IEEE Xplore. No OA payment is required for Traditional submission.

Page Charges

After a manuscript has been accepted for publication, the author's company or institution will be requested to pay a charge of \$110 per printed page to cover part of the cost of publication. Page charges for this TRANSACTIONS, like those for journals of other professional societies, are not obligatory, nor is their payment a prerequisite for publication. The author will receive 100 free reprints without covers if the voluntary page charge is honored. Detailed instructions accompany the proofs.

Mandatory Overlength Page Charges: If the voluntary page charge is not honored, the IEEE will impose a mandatory overlength page charge of \$200 per page for each page in excess of 10 pages for full papers, six pages for short papers, and four pages for letters. Detailed instructions on payment of these charges will accompany the page proof.

Copyright

It is the policy of the IEEE to own copyright to the technical contributions it publishes. To comply with the IEEE copyright policy, authors are required to sign the IEEE Copyright Transfer & Export Control Compliance Form before publication in either the print or electronic medium. The form is provided upon approval of the manuscript. Author must submit a signed copy of this form with their final manuscripts.

Submission of Final Manuscript

Page Numbers: Number all pages, including illustrations (which should be grouped at the end), in a single series, with no omitted numbers. Figures should be identified with the figure number and author's name at the bottom or on the back; keep the information in the margin, off the body of the figure.

References and Captions: Put references on a separate page and provide them in IEEE style. Figure captions should also be on a separate page from references and content. Do not include captions on the illustrations themselves. Figure captions should be sufficiently clear so that the figures can be understood without detailed reference to the accompanying text. Axes of graphs should have self-explanatory labels, not just symbols, wherever appropriate.

Illustrations and Photos: Figures and photos should be original figures and not photocopies. Photos must be glossy prints without screens. Laser prints are not acceptable in place of photos or where gray-scale graphics are involved. All line drawings and photos should be in black and white, unless specifically requested. Letters should be large enough to be readily legible when the drawing is reduced to two- or one-column width—as much as 4:1 reduction from the original. All materials should be no larger than 22 × 28 cm (8.5 × 11 in).

Electronic Form for Final Printing: For the final printed production of the manuscript, the author will need to provide electronic copy of the peer-approved version. Please be certain that changes made to the paper are incorporated into the final copy, and include all source files. Check that all files are complete including abstract, text, references, footnotes, biographies, and figures and captions. Figures, tables, and author photos may be submitted in .tiff, .eps, or .ps formats. A separate set of files should be submitted for graphics as they are processed separately from the manuscript. For more information on submitting electronic graphics, please visit the URL: <http://www.ieee.org/web/publications/authors/transjnl/index.html> and click on the link "Guidelines for Author supplied Electronic Text and Graphics." IEEE can process most commercial software programs, but not page layout programs. Do not send postscript files. The preferred programs are TeX, LaTeX, and Microsoft Word. An IEEE LaTeX style file or Word Template can be obtained at the URL: <http://www.ieee.org/web/publications/authors/transjnl/index.html>.

Author Names in Native Languages

IEEE supports the publication of author names in the native language alongside the English versions of the names in the author list of an article. For more information, please visit the IEEE Author Digital Tool Box at the following URL:

http://www.ieee.org/publications_standards/publications/authors/auth_names_native_lang.pdf

Graphical Abstract

This journal accepts graphical abstracts and they must be peer reviewed. For more information about graphical abstracts and their specifications, please visit the following link:

http://www.ieee.org/publications_standards/publications/graphical_abstract.pdf

ORCID

All IEEE journals require an Open Researcher and Contributor ID (ORCID) for all authors. ORCID is a persistent unique identifier for researchers and functions similarly to an article's Digital Object Identifier (DOI). ORCIDs enable accurate attribution and improved discoverability of an author's published work. The author will need a registered ORCID in order to submit a manuscript or review a proof in this journal.
