

Developments in Aquaculture and Fisheries Science – Volume 38

SEA URCHINS: BIOLOGY AND ECOLOGY

THIRD EDITION

Edited by

JOHN M. LAWRENCE

Department of Integrative Biology
University of South Florida
Tampa, Florida
USA

Amsterdam • Boston • Heidelberg • London • New York • Oxford • Paris • San Diego
• San Francisco • Singapore • Sydney • Tokyo
Academic Press is an imprint of Elsevier

Contents

Preface to the first edition	xiii
Preface to the second edition	xiv
Preface to the third edition	xv
List of contributors	xvii
1 Phylogeny of Sea Urchins	1
<i>Andrew B. Smith and Andreas Kroh</i>	
1 Introduction	1
2 History of research	1
3 Phylogenetic relationships	4
4 The fossil record of echinoids	7
5 Relationships amongst the Echinacea	9
References	12
2 Sea Urchin Life History Strategies	15
<i>John M. Lawrence</i>	
1 Concepts	15
2 Habitats and life history strategies of sea urchins	18
3 Conclusions	21
Acknowledgments	21
References	21
3 Sea Urchin Gametogenesis – Structural, Functional and Molecular/Genomic Biology	25
<i>Charles W. Walker, M.P. Lesser and Tatsuya Unuma</i>	
1 Sea urchin gametogenesis – structural microenvironment	25
2 Sea urchin gametogenesis – annual structural variation	25
3 Sea urchin gametogenesis – annual molecular variation	30
4 Sea urchin gametogenesis – environmental control	35
Acknowledgments	38
References	38
4 Biochemical and Energy Requirements of Gonad Development	45
<i>Adam G. Marsh, Mickie L. Powell and Stephen A. Watts</i>	
1 Cellular energy utilization	45
2 Energy metabolism during development	45
3 Biochemical components of cellular metabolism	47
4 Gonad growth	48
5 Gonad energy metabolism	49
6 Feeding and metabolism	53
7 Summary	54
Acknowledgments	54
References	55

5	Endocrine Regulation of Echinoid Reproduction	59
	<i>Kristina M. Wasson and Stephen A. Watts</i>	
1	Sea urchin gonads	59
2	Exogenous regulation of reproduction	59
3	Endogenous regulation of reproduction	60
4	Mechanisms of regulation	65
5	Gene regulation in reproduction	66
6	Conclusions	66
	Acknowledgments	66
	References	66
6	Larval Ecology of Echinoids	69
	<i>Anna Metaxas</i>	
1	Introduction	69
2	Patterns in abundance	69
3	Growth and development	70
4	Mortality and predation	72
5	Feeding	73
6	Swimming behavior and vertical distributions	73
7	Dispersal	75
8	Settlement	76
9	Conclusions	77
	References	77
7	Growth and Survival of Postsettlement Sea Urchins	83
	<i>Thomas A. Ebert</i>	
1	Growth	83
2	Survival	106
	Acknowledgments	112
	References	112
8	Digestive System	119
	<i>Nicholas D. Holland</i>	
1	Introduction	119
2	Structure and function of the definitive digestive system as a whole	119
3	Major regions of the sea urchin digestive system	122
4	Development of the digestive system	130
	Acknowledgments	131
	References	131
9	Feeding, Digestion and Digestibility of Sea Urchins	135
	<i>John M. Lawrence, Addison L. Lawrence and Stephen A. Watts</i>	
1	Introduction	135
2	Ingestion	135
3	Digestion	140
4	Digestibility	143
5	Conclusions	147
	Acknowledgments	150
	References	150

10 Nutrition	155
<i>Stephen A. Watts, Addison L. Lawrence and John M. Lawrence</i>	
1 Introduction	155
2 Basic considerations in sea urchin nutrition research	156
3 Feed development – dietary nutrient requirements	157
4 Basic nutrient profiles	161
5 Basic applications of feed development	166
6 Summary	166
Acknowledgments	166
References	166
11 Carotenoids in Sea Urchins	171
<i>Maeve S. Kelly and Rachael C. Symonds</i>	
1 Introduction	171
2 Distribution of carotenoids in sea urchins	171
3 Metabolism of carotenoids in sea urchins	174
4 The effect of dietary carotenoids on gonad color in sea urchins	175
5 The role of carotenoids in sea urchins	175
Acknowledgments	176
References	176
12 Disease in Sea Urchins	179
<i>Yi Nan Wang, Ya Qing Chang and John M. Lawrence</i>	
1 Disease in sea urchins in the field	179
2 Bacterial disease of cultured sea urchins in Japan	181
3 Bacterial disease of cultured sea urchins in other regions	183
4 Control of bacteria	185
References	185
13 Immunology in Sea Urchins	187
<i>Silva, J. R. M. C.</i>	
1 Introduction	187
2 The sea urchin genome and advances in the immune system studies	193
References	193
14 Sea Urchins as Drivers of Shallow Benthic Marine Community Structure	195
<i>Robert S. Steneck</i>	
1 Introduction	195
2 Functional evolution of sea urchins and their rise in ecological importance	195
3 Agents of biological disturbance, strong interactors and drivers of community structure	196
4 Drivers of ecosystem structure and function: seagrass, coral reef and kelp forest biome case studies	197
5 Convergent patterns and process: Conclusions, synthesis and speculation	204
Acknowledgments	207
References	207
15 Stock Enhancement	213
<i>Yukio Agatsuma</i>	
1 Means for stock enhancement	213
2 Habitat enhancement	213

3	Transplantation of wild populations	214
4	Seed production	215
5	Reseeding	217
	References	221
16	Cidaroids	225
	<i>John M. Lawrence and Michel Jangoux</i>	
1	Introduction	225
2	Functional morphology	225
3	Growth	231
4	Reproduction	231
5	Developmental modes	232
6	Symbionts	235
7	Ecology	236
	Acknowledgments	240
	References	240
17	<i>Centrostephanus rodgersii</i>	243
	<i>Maria Byrne and Neil Andrew</i>	
1	Biogeography	243
2	Ecological impacts	243
3	Population regulation	246
4	Reproduction	249
5	Development and larval ecology	250
6	Growth and age	251
7	Fishery and resource management	253
8	Conclusion	253
	Acknowledgments	254
	References	254
18	Diadema	257
	<i>Nyawira A. Muthiga and Timothy R. McClanahan</i>	
1	Introduction	257
2	Population biology and ecology	259
3	Community ecology and coexistence	265
4	Herbivory and grazing effects	268
5	Conclusions	269
	References	269
19	<i>Arbacia</i>	275
	<i>Paola Gianguzza and Chiara Bonaviri</i>	
1	Introduction	275
2	Population biology	276
3	Ecology	278
	Acknowledgments	280
	References	280
20	<i>Loxechinus albus</i>	285
	<i>Julio A. Vásquez and Gonzalo A. Donoso</i>	
1	Introduction	285
2	Morphology	285

3	Distribution	285
4	Habitat and substrate preferences	285
5	Food	286
6	Reproduction ecology	286
7	Population and community ecology	288
8	El Niño effects	291
9	Fishery	291
10	Fishery enhancement	292
11	Aquaculture and restoration	293
12	Conservation	293
	References	293
21	<i>Paracentrotus lividus</i>	297
	<i>Charles F. Boudouresque and Marc Verlaque</i>	
1	Introduction	297
2	Distribution and habitat	297
3	Food and feeding	303
4	Movement and Migrations	309
5	Mortality	310
6	Growth	313
7	Reproduction	314
8	Conclusions	318
	Acknowledgments	319
	References	319
22	<i>Psammechinus miliaris</i>	329
	<i>Maeve S. Kelly, A.D. Hughes and E.J. Cook</i>	
1	Appearance	329
2	Distribution	329
3	Habitat	329
4	Density	330
5	Population structure	330
6	Food and trophic ecology	330
7	Growth rates, aging, and energy partitioning	332
8	Reproduction	332
9	Dietary carotenoids and gonad color	333
10	Larval biology	333
11	Resilience to climate change and pollutants	334
	References	334
23	<i>Echinometra</i>	337
	<i>Timothy R. McClanahan and Nyawira A. Muthiga</i>	
1	Introduction	337
2	Population biology and ecology	339
3	Community ecology and coexistence	345
4	Herbivory and grazing effects	347
5	Conclusion	349
	References	349

24	<i>Evechinus chloroticus</i>	355
	<i>Michael F. Barker</i>	
1	Introduction	355
2	Geographic distribution	355
3	Habitat	355
4	Associated species	356
5	Feeding	357
6	Movement	359
7	Reproduction	359
8	Larval development	361
9	Recruitment	362
10	Population biology	364
	References	366
25	<i>Heliocidaris erythrogramma</i>	369
	<i>John K. Keesing</i>	
1	Introduction	369
2	Population genetics and color variability	370
3	Reproduction, development, settlement and recruitment	370
4	Growth and age	372
5	Movement and feeding	372
6	Influence on benthic plants, occurrence of sea urchin barrens and feeding fronts	374
7	Response to climate change	375
8	Predators, parasites, commensals and other sources of mortality	376
9	Conclusions	376
	References	377
26	<i>Strongylocentrotus droebachiensis</i>	381
	<i>Robert E. Scheibling and Bruce G. Hatcher</i>	
1	Distribution and abundance	381
2	Food and feeding	383
3	Growth	389
4	Reproduction	391
5	Larval ecology, settlement and recruitment	394
6	Predation	396
7	Disease and parasitism	399
8	Mortality due to abiotic factors	400
9	Ecological role	400
	Acknowledgments	403
